

Outstanding 100% Corundum Performance...

- Are you challenged with severe gases and atmospheres?
- Do you need 100% strength at extreme high temperatures?
- Inert products that keep 100% performing under high pressure?

Then we can give you 100% performance...

...for your reformer, reactor and burner!

Our sintered corundum products with **100 Corundum Performance™**, designed in any complex shape, will prevail!

100 Corundum Performance™

P-D Refractories

100 Corundum Performance™ is a unique method developed by P-D Refractories that assures 100% pure material for 100% strength into the most challenging conditions. Thermoshock, high temperature and high pressure will be 100% outperformed.

Simple to install, reduce production costs and improve your performance, quality and safety

100 Corundum Performance™ adds Value to your production process!

» WE SERVE THE PETROCHEMICAL INDUSTRY

- since 1872 experience in refractory production and technology
- own production sites and raw material sources – Germany, Czech Republic and Slovenia
- yearly output up to 185,000 tons of refractory material
- fully automatized production steps and mould production in steel, wood and plastic
- all sites and raw material sources are ISO DIN 9001 and 50001 certified
