

Zirconia Burner Block Improves Melting Performance...

- Do you need long lasting products?
- Durable in the most demanding applications?
- Clean products that do not contaminate your process?

Then we have for you endurance...

...for your container, float, fiber or technical glass furnace!

Our sintered Zirconia products with **Zr₂ck Endurance™**, designed as burner-, support-, gathering-, lintel-, peephole- or even as tuckstone block will convince you!

The **Zr₂ck Endurance™** is a unique method you can rely on! Developed by P-D Refractories with special components that strongly suppresses hot erosion and improves gas and abrasion resistance in the extreme exposed areas of the superstructure of your glass melting furnace. Especially predestinated for oxy fuel and/or batch preheating.

Simple to install, reduce production costs and improve glass quality

Zr₂ck Endurance™ adds Value to your Glass making process!

» WE SERVE THE GLASS INDUSTRY

- over 145 years of experience in refractory production and technology
- own production sites and raw material sources – Germany, Czech Republic and Slovenia
- yearly output up to 200,000 tons of refractory material
- fully automatized production steps and mould production in steel, wood and plastic
- all sites and raw material sources are ISO DIN 9001 and 50001 certified
